“CREATIVITY BLOOMS” Despite the rapid advancement of technology, there is a global rise of individuals who are interested in making things and creative, self-expressive opportunities. We are also witnessing new collaborations in the arts and sciences, therefore, re-thinking pre-existing modes of work and play (i.e., making/tinkering”, and “DIY” (Do It Yourself).

SUSTAINABLE DESIGN (up-cycling) concepts and practices play an integral role. Employing materials or textiles that have already been produced whether considered having worth or not. (The average American generates 87 lbs. of textile waste per year, equaling 11 million tons in our landfills annually, (of which 95% recyclable).

*All materials will be provided *Classes held at LSCC.
